

Monument to Man Who Founded the National Grange

A monument in memory of Oliver Hudson Kelley, founder of the National grange, nation-wide farmer's organization, was unveiled at Kelley's grave in Rock Creek cemetery, Washington. He conceived the idea of the grange while an employee of the Department of Agriculture. Photograph shows Mrs. Elmer E. Reynolds of Washington laying a sheaf of grain at the foot of the monument.

Three New Destroyers Launched for German Navy

Scene at Wilhelmshaven, Germany, at the launching of three new torpedo boat destroyers for the German navy. A great crowd attended and the ceremonies were quite elaborate.

F. O. Lowden on His Favorite Mount

Frank O. Lowden, former governor of Illinois and much talked of as a Presidential possibility, takes a horseback ride every day when he is at his Springfield farm near Oregon, Ill. He is seen above on Juno, his favorite mount.

They Don't Like Washington Much

Blanche Bailey of Phoenix, Ariz., and Mary Parman of Ponca City, Ariz., picturesquely garbed, as they arrived in Washington after driving across the continent. One of their first experiences in the capital was to be told they'd have to pay their own damages, they said that the capital was "an awful town."

FROM THE FOUR QUARTERS

Echo soundings by ships are proving successful. Bones of cattle and sheep are an important item in China's export trade. A dollar bill's lifetime was once 20 months, but it is now only six months. The possibility of transporting live fish from Alaska to a Chicago aquarium by freezing them in blocks of ice and then thawing them out is considered.

American ate more ice cream in 1935 than in any previous year. Whales taken into Norway ports by fishermen last year had a total value of \$18,000,000.

A famous cypress tree in Mexico is said to be four thousand to six thousand years old. Boulder, Colo., is planning to use melting ice from a glacier to supplement its water supply.

AFTER 38 YEARS

After thirty-eight years of faithful service with the post office in New York City, Daniel E. Fox retired, and was presented with a leather bag by Postmaster John J. Kiely. He is seen here working on his last piece of mail.

MAJ. J. C. WADDELL

Maj. James C. Waddell has just assumed his new duties as supervisor of brewery control in the prohibition enforcement unit, succeeding Thomas E. Stone. He is a graduate of West Point and New York University Law school and served in the World War.

Not Apt Description

Many a person who is a small eater has been described as having "a bird's appetite." How inaccurate this designation is may be gleaned when one learns that many birds eat several times their own weight each day.

Simple Problem

An architect doesn't need to be exact. If he has a little corner left over he can call it a closet or a breakfast room.—Baltimore Sun.

RADIO

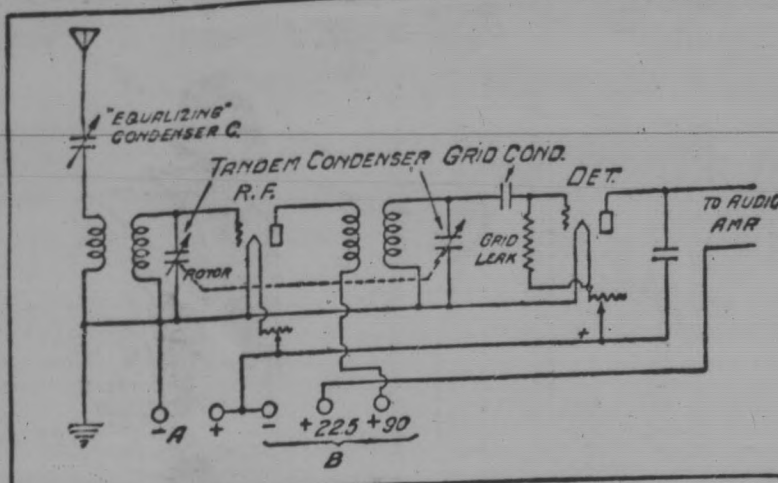

Diagram Showing Tandem Tuning Scheme.

By ZEH BOUCK

In the New York Herald-Tribune.

It is the purpose of this article to consider the new ideas involved in tuning several radio-frequency circuits simultaneously by means of two or more condensers mounted on a single shaft.

The "problems" of tandem tuning are really nothing more than the problems of scientific design slightly emphasized. In some respects they are mechanical rather than electrical, and in all cases are modified, with other problems, in individual receiver design. There are, however, some general points which should receive primary consideration before the specific niceties are tackled.

There is really only one fundamental "secret" to successful tandem tuning. This is the matching of inductive and capacitive values in the individual tuning circuits, which considers the inductance and capacity introduced by leads and wiring. It is the problem of the designer so to arrange his parts and their interconnections that the parasitic capacities and inductances are either negligible or are the same in each stage of radio-frequency amplification.

This accomplished there remain only the matching of the deliberate inductances (the tuning coils) and the capacities of the tuning condensers. The latter is taken care of in the case of any reliable condenser, such as the Amco "Siamese," which the writer used in his experiments.

It is the designer's job to match the inductors.

"Vernier" capacitances and inductors, of any type whatever, can be used to balance stray capacities and inductive values as well as poorly matched inductors. However, no vernier can efficiently compensate the capacitive discrepancies in some types of condensers. Compensation on one wave length is immediately upset upon tuning to another frequency.

Coils Recommended.

Coils characterized by a relatively low L to C ratio are recommended for use in tandem circuits, contrary to general practice. In other words space-wound coils and similar tricks designed to reduce the capacity of the windings, are not recommended in tandem tuning circuits. The use of higher capacity coils lowers the proportion of tube and stray capacity to total circuit minimum capacity, thus reducing whatever effect tube changing may have upon tuning. Tandem tuning, needless to say, can be adapted to practically any tuning

system. A fundamental circuit accompanies these notes.

Attention is particularly directed to the input or antenna coupling circuit. The proximity of the antenna circuit, in almost every case, will throw the tuning of the first condenser out of alignment unless this condition is especially considered and properly compensated. There are two immediately possible ways of doing this. The first is to employ the usual aperiodic primary with very loose coupling, or variable coupling correctly compensated by the King Equamatic system. The second, and at present preferable arrangement, is the use of the antenna tuning condenser. A certain optimum input (across primary) capacity should be decided upon by the designer—say 25 or thirty micromicrofarads. The average antenna capacity will vary anywhere between this value and perhaps 200 "micromikes." To reduce it to the desired across-coil capacity, the series condenser of about 50 mfd. is introduced as suggested. The condenser is varied for individual antennas, and left set when the correct value is discovered. It is recommended that this condenser be mounted within the cabinet, to discourage the itching fingers of the average fan.

Antenna Compensation. If two stages of tuned radio-frequency amplification are employed previous to the detector tube, with one single and one tandem condenser, it is advisable to shunt the single condenser across the first secondary. This will eliminate the antenna compensation problem. (Antenna compensation, however, is still desirable if only to maintain dial alignment.) Almost any efficient system of stabilizing the r. f. stages is recommended for use with tandem tuning circuits. The addition of the stabilizing arrangement presents no extraordinary difficulties.

All grid returns, in virtue of the common grounded rotor, are brought down to the negative side of the "A" battery. This fact slightly modifies the detector circuit. Detectors efficiency postulates a positive grid potential. To secure this, instead of shunting the grid condenser with the leak, as is usually done when the grid return is brought down to the plus filament terminal, the resistor is connected between the grid and filament (plus of course) direct. Tandem tuning presents no real difficulties and demands only the intelligent application that must go into the design and building of any receiver satisfactory to the discriminating enthusiast.

Wave Length Range and How to Keep in Tune

Two simple principles applied to the average receiving set will enable the operator to keep in tune with all waves from 200 to 600 meters. If a coil of wire is placed in series with the antenna, it has virtually the same effect as increasing the wave of the antenna, thereby making it possible to pick up higher wave lengths. The larger the coil, the greater will be the increase in wave length. If a variable condenser is placed in series with the antenna or ground wire, the wave length range of the set is reduced. The smaller the capacity of the condenser, the greater will be the cut in wave length. To place a coil in series with the antenna, connect the lead-in wire to one end of the coil and run a wire from the other terminal of the coil to the antenna binding post on the set. A series condenser is connected the same way.

Length of Aerial to Get Desired Results

Use a short aerial for selectivity, and a long outdoor aerial for volume and distance. A combination of the two can easily be arranged by installing a single-pole double-throw switch. Run a length of bell wire through one or two rooms or around the molding in one room for the in-

door aerial, the end of which is attached to one of the switch posts. The other post is attached to the long aerial coming in from the outside. The center contact goes to the aerial post on the set.

Part Played by Tubes on Your Crystal Set

Crystal sets without tubes are for local stations. One-tube sets will reach out almost as well as multi-tube sets if a good aerial is installed. Tubes added after the detector add little if any to the distance received, but do add greatly to the volume. Tubes before the detector mean sensitivity and permit only a small aerial to get the same distance. A loop is not used without radio-frequency amplification.

Simplifying Radio

Fifty feet of wire of little more than pencil thickness, hung vertically from the cross-arm of a wooden pole 70 feet high, has been flashing radio programs from 2XAF, Schenectady, N. Y., to practically every corner of the habitable globe.

Loop Aerials

From the experience of radio engineers throughout the country it has been found that the average loop aerial is about 5 per cent as efficient as the average outdoor aerial.

Theory of Operation of the Loop Antenna

The theory of operation of the loop antenna is clearly explained in the following words:

Suppose we have two vertical wires separated by a distance of 200 meters, both of them insulated from each other and from the ground. Now, if a wave approaches from a direction perpendicular to the plane of the two wires, it will reach each wire at exactly the same time, and the voltages induced will be exactly in phase. If the wave approaches from some other direction, it will reach the two wires at different times, and therefore, the induced voltages will be out of phase with each other. If the wave approaches in the direction of the plane of the two wires and has a wave length of 400 meters, the two induced voltages would be 180 degrees out of phase. Therefore, the voltage at the top of one wire will be a positive maximum when the voltage at the upper end of the other wire is at a negative maximum. Now if the

upper ends are connected together to form a loop, and the input to a receiver is connected across the lower ends, current will flow around the circuit, and if the circuit is tuned by a condenser, the currents will become comparatively large. The induced voltages will be greatest when the wave and loop are both in the same plane, since this will result in maximum phase displacement between the voltages induced in the front and rear wires of the loop.

Cushion Mounting

Four small air-cushion feet, such as are used on typewriter legs, make excellent cushions for the radio receiver. Place one foot under each corner of the cabinet and much of the microphone noise usually experienced will be eliminated.

Parallel Wires

Poor reception is often caused by having the antenna and ground wires running parallel with each other. For best results these two wires should be kept at right angles with each other.

SATURDAY, AUGUST 21, 1926

OUR COUNTY AT THE FAIR

SAN MATEO COUNTY has in the past been very creditably represented at the State Fair at Sacramento. Prize winning exhibits of flowers, garden vegetables and manufactured products have been sent to Sacramento from this county during several years. Much of the credit for past success is due to this county's horticultural commissioner, A. W. Tate, Jr., and whatever disappointment and dissatisfaction there has been in the past has been in no way attributable to him.

This year Commissioner Tate is again working hard to make the San Mateo County Exhibit a success. He should be given every encouragement and assistance. He would appreciate having anyone with choice flowers, vegetables or other produce communicate either with him at the courthouse or with the Redwood City Chamber of Commerce. Co-operation in this matter will greatly lighten the burden of our commissioner, and will help to put this county on the map as far as the State Fair is concerned.

SAVING THE WILD GAME

AS the population of the peninsula increases, and the increased use of the automobile makes it easier for the hunter to reach hitherto secluded spots where the wild game was formerly wont to gather for refuge from the rifle of the hunter, the need of proper protection of our wild life becomes more and more apparent. Without some place of refuge the deer and other wild game of this county would soon become extinct as many forms of wild life have already.

Fortunately for the peninsula, we have here a public service corporation which has taken a very active interest in the preservation, and being in a position to offer protection, has done much to preserve the game of this county. This is the Spring Valley Water Company, which has made its holdings in this county, some thirty-six square miles, a large game refuge. Here the deer live in peace and become very tame and the quail raise their broods without fear of molestation.

The Spring Valley Company has taken a firm stand in this matter and has asked the co-operation of the hunters of this county in keeping the wild game safe in this retreat. It is doing this for the benefit of future generations, and should receive the support of every individual in this worthy endeavor.

MRS. KAHN FOR CONGRESS

IF the people of the Fourth Congressional District are true to themselves and true to their best interests they will return Mrs. Florence P. Kahn to Washington. She can do more for the district than can any new man or woman. Owing to her long residence at the National Capital where her illustrious husband, the late Julius Kahn, represented the Fourth District for a quarter of a century, her acquaintance with public officials and her intimate knowledge of the various departments give her a decided advantage in securing favor for her district. It would, indeed, be a big mistake for the voters to retire her at this time when the district needs her assistance and support at Washington. Mrs. Kahn is certain to be returned to her post by a large plurality.

CALIFORNIA VOTERS WILL REMAIN TRUE

THE California voter will not knowingly and deliberately let down the bars to products from lands whose standards of living are immeasurably lower than can well be comprehended in this country.

Should the protection now afforded California industries by the tariff be removed or lowered, wages will drop in this country. Farm products will enjoy a greatly reduced return for labor and expenditures, and young men and women will be driven from the farms into the cities at an alarming rate.

To make certain the continued and increased protection of California products, Senator Samuel M. Shortridge should be returned to the United States Senate. He is a steadfast tariff man, with the interests of the farmers always in mind.

The American standard of living must not be lowered. A thoughtlessly cast vote may help to bring about this disaster.

CANDIDATE FOR CONGRESS

Mr. Free has been one of the outstanding characters in the lower house during his incumbency and has at all times watched procedure in order that his constituency would be protected. The fruit growers and walnut men have him to thank for keeping their products on the preferred lists. He has been a friend of organized labor and has been one of President Coolidge's intimate advisors. His closeness to the administration makes him a particularly desirable man and his ranking position on several of the best committees gives him a chance to initiate and push legislation that comes only to those who have seen years of service in Congress.

A GOOD MAN, KEEP HIM

HARVEY TOY, president of the State Highway Commission, has laid out a big plan of operation for the improvement of the state highways in this county and has promised that he will begin at the earliest possible moment the completion of the Bayshore Highway which means so much for the peninsula. Mr. Toy is a San Francisco man who has the best interests of the peninsula at heart. He will do a great deal for the county but Mr. Richardson must be elected if he is to remain on the commission. It will be for the very best interests of San Mateo county to keep Mr. Richardson at the capital and Mr. Toy on the Highway Commission.

GOOD BUSINESS

Says the man seeking public office for the first time: "Here is what I WILL do for you after I am elected!"

Says the tried public servant seeking re-election: "Here is what I HAVE DONE for you!"

And by his record you shall judge him.

Providing that record contains a sterling list of achievement, would you be justified in giving his job to an untried man?

You wouldn't?

Then you should vote to retain Senator Samuel M. Shortridge.

HE SAVES US MONEY

THE Commission of Immigration and Housing of California has cost the state during the administration of Governor Friend W. Richardson \$224,726.80 as compared with an expenditure of \$251,113.74 during the preceding administration.

This commission has three departments: A complaint department, which is a legal aid bureau for immigrants; Camp Sanitation Department, through which inspections are made and law enforcement is had of the Labor Camp Sanitation Act; and the Housing Department which enforces the State Housing Act. These departments, due to new problems and increased work have expended \$21,420.65 more than during the preceding administration but the material saving has been in the administration of the commission, \$23,394.10 having been saved to the state through economy and efficiency.

Some of the accomplishments of the Immigration and Housing Commission of California during the administration of Governor Richardson are the securing of better co-operation from local officials and employers and the training of building inspectors. The United States Forestry Service has co-operated with the state department in enforcing sanitary regulations in lumber camps. Enforcement of the State Housing Act has been rendered more effectual by the training of local building inspectors by state experts.

One of the new functions of the Commission added by the 1925 Legislature is the approval of plans for new jails.

HE IS A RESIDENT OF YOUR COUNTY

THE voters of San Mateo county are going to give Senator Shortridge a tremendous vote on August 31. He is a resident of the county, has made a good senator and is in a position to do more for this section than any new man could do. A vote for S. M. Shortridge is a vote to keep San Mateo county represented in the upper house of Congress. His vote should be unanimous. Make it so by your ballot on August 31.

WARNING HUNTERS

BASING its action on the importance of protecting the wild life in San Mateo county, the Board of Supervisors of San Mateo county, passed Ordinance No. 342 containing the following language:

"Section 1. It shall be unlawful to shoot on or to trespass while carrying firearms on any private property having procured and without the possession of the written consent of the owners or lessee or lessees of the property."

"Section 2. It shall be the duty of the constables and all peace officers to enforce the ordinance."

The greatest animal refuge in the County is the Spring Valley Water Company. It is a thirty-six square mile life abundant there, notably deer, which are remarkably tame. Deer refuges are a very great benefit in California herds. It is therefore imperative that they be respected by hunters.

SPRING VALLEY WATER COMPANY of the authorities, Federal, State and local, for years safeguarded the deer on its watershed. It proposes to continue this policy.

Those hunters who do not respect the law are being vigorously enforced. The law is being vigorously enforced. The Spring Valley Water Company has the Fish and Game Commission's aid. The Fish and Game Commission is intensively patrolled during the season, and that hunters caught will be arrested and prosecuted.

THE STORMING OF THE GATES

This picture is typical of many such scenes enacted daily at the main gates of the Sesqui-Centennial International Exposition in Philadelphia where the 150th anniversary of the signing of the Declaration of Independence is being celebrated. The "shot" was made from outside the gates and shows the long sweep of historic Broad street, the main artery of the exposition. To the left can be seen one of the capitols of the Palace of Liberal Arts and Manufactures which covers nearly eight acres of grounds and which houses some of the finest exhibits ever seen. The Exposition will continue until December 1.

The Philadelphia of Our Ancestors

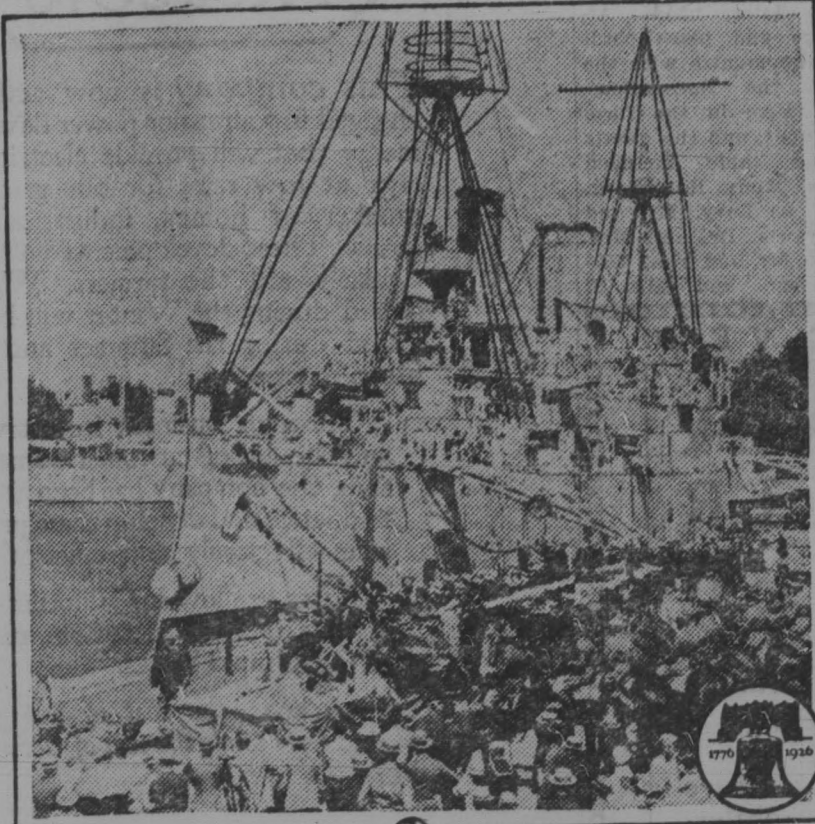

Here is shown a section of "High Street," a reproduction of Philadelphia's famous Market street in the days of 1776. It is one of the outstanding features of the Sesqui-Centennial International Exposition now being held in Philadelphia to commemorate the 150th anniversary of the signing of the Declaration of Independence. Every building has been built to actual size and in actual architectural detail. The furnishings of each building are exact reproductions of those used in the Revolutionary days. Many of the pieces on display are the originals and today are worth thousands of dollars because of their historic value. The Exposition continues until December 1.

A TOUCH OF OLD SPAIN

These entertainers have been brought to the Sesqui-Centennial International Exposition in Philadelphia where 150 years of American Independence is being celebrated, by the Los Angeles County, California, Chamber of Commerce. The westerners have built a fine old Spanish mission in the Palace of Foreign, Civic, Fashion and Agriculture Display and there show the resources and advantages of their native heath. The musicians and dancers entertain all visitors who enter the patio to rest a bit after "doing the exposition." The Exposition continues until December 1.

The famous old flag ship is shown at her berth in Philadelphia Navy Yard, the background for the Sesqui-Centennial International Exposition which celebrates 150 years of American Independence. Docked just in front of the Olympia is the U. S. S. Constellation, oldest fighting ship in commission. They daily attract thousands of visitors to the Exposition which continues until December 1.

GRECIAN DANCERS AT THE SESQUI

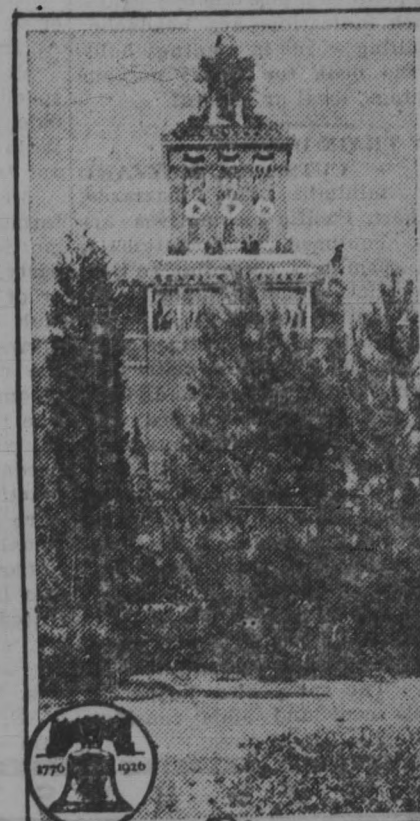

These dancers have selected for their graceful performance the keystone shaped pool in the court yard of the Pennsylvania State Building at the Sesqui-Centennial International Exposition in Philadelphia, which celebrates 150 years of American Independence. The spot is one of the most beautiful and artistic on the exposition site. The Exposition continues until December 1.

ON THE SESQUI LAGOONS

Here are Americans, visitors to the Sesqui-Centennial International Exposition in Philadelphia which celebrates the 150th anniversary of the signing of the Declaration of Independence, riding about the lagoons in an Italian craft, a gondola, from which they view the buildings and displays from many lands. In the distance can be seen the mammoth Sesqui Stadium; to the right is the signal tower of the United States Coast Guard building and exhibit, and to the left is one of the Japanese pagodas which dot the exposition grounds. The Grecian pavilion is one of the permanent structures on the site before the city government decided to build the Sesqui at the front door of the great Philadelphia Navy Yard. The Exposition continues until December 1.

"A Thing of Beauty Is a Joy Forever"

This is one of the beauty spots of the Sesqui-Centennial International Exposition in Philadelphia. The exposition celebrates the 150th anniversary of the signing of the Declaration of Independence. The view shows the tower of one of the main exhibit buildings rearing its head up from among the gorgeous landscape which artists have built around the giant structures which house exhibits from forty-three nations of the world. The Exposition continues until December 1.

Old English Law

The practice of permitting a legally incompetent person to sue by his next friend originated in England. It was first authorized by the statute of Westminster, passed in the reign of Edward I.

"The Vine"

This magnificent bronze by Harriet Frishmuth is on display in the Palace of Fine Arts at the Sesqui-Centennial International Exposition in Philadelphia where the 150th anniversary of the signing of the Declaration of Independence is being celebrated. This is but one of the many gorgeous and beautiful things to be seen in the Fine Arts exhibit. Famous artists from all parts of the world have sent their paintings, etchings and sculptures to Philadelphia to be exhibited during the exposition, which continues until December 1.

Those Who Laugh Last— "Kicked by Mule No. 10," says a New York Evening Post headline. It never was, but many persons have always considered it a joke. They were the ones who never had been kicked by a mule.

LAST WILL OF FATHER GRANT PUT ON RECORD

The will of Father James A. Grant, late priest of St. Catherine's parish, Burlingame, disposing of an estate valued at "less than \$10,000," according to the petition was filed in the Superior Court here Tuesday. The Bank of Italy is the petitioner.

Stocks and bonds are bequeathed to relatives in Canada and \$25 per month each to John McKerron and Mrs. A. G. McKerron, San Francisco, provided by a trust fund. Father Grant's library is left to Brother Joseph of St. Mary's College, Oakland and personal effects to Father John Roberts, assistants to the late Father Grant.

The will is dated at St. Luke's hospital in San Francisco, July 31, last, eleven days prior to the death of Father Grant, after an operation at the hospital. The estate consists of real estate, stocks and bonds and cash in banks, the petition states.

DONNELLY WILL FILE

Mrs. Helen F. Donnelly has filed in the office of County Clerk Elizabeth M. Kneese the last will and testament of Patrick H. Donnelly, who died in Redwood City on July 19, 1926. The will is dated at Chicago, June 20, 1926.

The value of the estate is placed at \$42,050 and consists of personal property comprising of stock in the Dupont Powder Company, the Atlas Powder Company and other securities.

By the terms of the will the entire estate is bequeathed to the petitioner, Helen F. Donnelly, widow of the decedent. The heirs at law are the widow and two sons, M. E. Donnelly and Alexander M. Donnelly. A. J. Stebbins is the attorney for the executrix who is named to serve without bonds.

Mr. Donnelly was connected for many years with the Dupont Powder Company and had retired from the company on a pension and was enjoying life in Redwood City. He had been an old resident of Chicago but came west a few years ago to enjoy the warmth of California.

DIVORCE SUIT

Matt Franic filed suit for divorce this week in the Superior court here against Erna Franic. The couple were married in San Francisco, July 16, 1926, and separated on August 10.

SCHOOL MONEY APPORTIONED
Hon. Will C. Wood has sent information to Pansy Jewett Abbott, Superintendent of San Mateo County schools, apportioning for the school year 1926-1927:

\$227,041.13 for the elementary schools.
\$ 75,461.91 for the secondary schools.
\$ 31,400.00 for the Junior College.

WHAT IS A COUNTY AUDITOR?

The officer who is responsible for the finances of the county. What are the duties of this officer?

He authorizes the Treasurer of the County to pay all just claims upon the treasury of the county. He handles the redemption of property that is sold for delinquent taxes, an average of one thousand a year.

He makes up the tax rolls before they go to the Tax Collector and charges him with the collection of the taxes.

Who is the Auditor of San Mateo County?
J. J. SHIELDS
When does his term expire?
On Jan. 3rd, 1927, at noon.

How long has he been County Auditor?
12 years at the close of this year
Does he seek re-election?
Yes.

What has he done to merit re-election?
He has given entire satisfaction in the conduct of his office as has been attested by the laudatory report of the Grand Jury after year after year. His recommendations to the Board of Supervisors in his budget have always been received and favorably commented upon by the Board. Universal satisfaction has been given in the matter of redemptions (about 1000 a year). During the incumbency of the present Auditor it has been the unwavering policy of the office to treat each one with every possible courtesy.

Do you believe in retaining in office an efficient and experienced public official? Let your answer be YES by voting at the election on August 31st, next for
J. SHIELDS FOR COUNTY AUDITOR

IMPRESSIONS OF OUR COUNTRY

In 1883 a visitor to the county describes enthusiastic scenes which he found. The description holds true today in all essential particulars and though the county has a phenomenal development years intervening, it has kept those beauties over which the visitor enthused. He writes as follows:

The scenery of San Mateo is the most beautiful and of any county in the state. It is the fertile valley of the bay, extending to the hills, dotted with live oak and oak, in contrast with the fields of grain. Still towards the summit are wood forests and the mountains; and now the western of the mountains covered with chaparral, fast disappearing the reaper or plow.

One can now come into view the views in contrast with the redwood forests and lower from some of the best scenery to be found.

Such the larger portion of the county is mountainous and broken by principal exceptions being the bay front, where a highly and beautiful valley varying width extends along nearly the whole of the eastern side of the county, and on the ocean front the vicinity of Halfmoon Bay.

HIGH HOLY DAYS

Invitation to members of the community of Redwood City to participate in religious services in San Francisco, during the High Holy Days is extended through a Sponsorship Committee of prominent San Francisco who have arranged for worship at the First Congregational church at Post and streets, that city.

There is to be no sale of seats admission charge but donations may be made to the committee desiring to do so and buttons thus derived will be given to the Jewish Consular Relief Society for the relief of the tuberculous patients in Denver, Colorado.

This society is one of the best of its kind in the world. Its members are to be sent to the conference of American Rabbis and a special traditional musical program, augmented by instrumental and soloists under the direction of H. Cammack, widely known organist, will be a distinctive feature of the services.

Services will be conducted for Rosh Hashanah, the Jewish New Year, September 8 and 9, and for Yom Kippur, the Day of Atonement, Friday evening, September 10 and Saturday, Sept. 11, by the Herman Rosenwasser, a rabbi of the Hebrew Union College and a member of the Conference of American Rabbis.

A choir and a special traditional musical program, augmented by instrumental and soloists under the direction of H. Cammack, widely known organist, will be a distinctive feature of the services.

DOROTHY DARNIT

Better Health... Longer Life

GORGAS MEMORIAL INSTITUTE

By JOHN NEVIN, M. D.
Jersey City, N. J.
Member Gorgas Memorial Institute

This is the age of preventive medicine. In the past, most of the efforts of the medical profession were in the direction of cure; while many activities now are engaged with the prevention of disease.

In every progressive community there are numerous units such as hospitals, laboratories, Board of Health controlling contagion and sanitation, examination of food and food handlers, medical inspection of school children, clinics, etc. Physicians are taking advantage of all these facilities to assist in diagnosis, and there is more co-operation between these agencies and the medical profession than ever before.

In order that satisfactory results may be obtained they must have the support of the individual because in the final analysis the health of the community depends on the health of the individual. Each one, therefore, should, at frequent intervals, have himself and his family checked up and a survey made of the physical condition.

Many diseases are insidious in character. Diabetes, kidney diseases, tubercular and cancerous conditions, heart diseases, and paralysis do not always present preliminary symptoms that are recognized or appreciated by the layman.

A periodic examination will develop a surprising large number of cases who are not physically fit, many of whom are amenable to treatment with a good prospect of being restored to at least a fair condition of health. Don't wait for the crash. Avoid it!

Persistent headaches, lassitude, lack of energy, shortness of breath, internal disturbances, insomnia, nervousness, may have some basis elements that may be considered as danger signals. It is important from the personal, family and community standpoint that the cause be discovered as soon as possible. Each life has an economic value.

Much can be done for mental and nervous conditions if recognized early. Patients, who in the past would become institutional cases are now restored to normal health and become useful citizens.

Obesity is a menace to health; it is a contributory cause of diabetes, kidney and heart disease. No attempt any reducing measures based on advertisements. Many of these are fraudulent; some actually dangerous. Seek competent advice along the lines of diet and medication.

Underweight usually means a lessened resistance to disease and an effort should be made, under medical direction, to upbuild and restore to normal standard. Many proprietary food preparations are recommended for this purpose, but ordinary foods under proper regulations are sufficient and much less expensive. It is most important that the cause of underweight be ascertained.

The Gorgas Memorial recommends that whether any symptoms that are disturbing exist or not, have an inventory made of your physical condition, at regular intervals. That is, generally speaking, the most certain way of insuring a long, healthy life.

SEEK NEW ROAD FROM SKYLINE TO OCEAN

M. J. Lyon, well-known real estate promoter of San Francisco, appeared before the board of supervisors Monday with a plan for the construction of a road from the Skyline boulevard to the ocean to take the place of the present Kings Mountain road. Lyon represented property owners of the Tunitas Glen district and presented maps showing the proposed route of the road, which he claims will reduce the grade from a 10 per cent to a three per cent grade. A road of 40 foot width is planned.

Lyon stated that his clients were willing to give the right of way for the road. He suggested that an assessment district be formed to finance the construction of the proposed road. The matter was taken under consideration by the board of supervisors.

Pasadena, California
Member Gorgas Memorial Institute

Near sighted children are apt to be great readers. They cannot see distinctly at a distance and consequently resort to reading as a substitute for the play and games of their unhandicapped mates. Distinct vision is only possible at the near point.

Myopia, or near sight, unlike other visual defects correctable by glasses, is a disease. Neglected, it is liable to become progressive and lead to blindness.

Thirty odd years ago, Dr. Risely of Philadelphia stated that in the previous fifty years Myopia had been reduced fifty per cent in this country. He attributed this remarkable improvement to the increased attention to the eyes of school children during that period which resulted in the correction of visual defects by glasses.

Today, in the writer's opinion, based upon over thirty years active experience as an oculist, that fifty per cent reduction has been easily increased to seventy-five per cent. This has been accomplished by the oculists of the country principally in their work with the school children.

The visual defects of childhood are often slight but important because of the plastic period of growth and the possibility of development in the wrong direction. The eyes of children should always be examined by an oculist. He alone is equipped with the facilities and permitted to use the measures essential to the thorough and scientific examination of a child's eyes. This is only possible by the temporary suspension of the function of accommodation only permissible at the hands of a graduated physician.

The function of accommodation is especially strong in childhood and enters into an examination in which it is active as a misleading factor. Hence its suspension is essential.

There is a temptation, which is not always resisted, on the part of those outside of the medical profession, to bring this measure into disrepute, claiming that it is injurious to the eyes. The opinion is directly contrary to the facts, and probably is most common among those without scientific training.

The Gorgas Memorial recommends that conscientious parents should take their children to a qualified oculist whenever indications point to a possible eye strain. Such indications are headache, miscalling words in reading; holding the book too close; nervous symptoms, local or general.

NEW TRAIN DEVICE CUTS FIRE HAZARD

To minimize fire hazards, Southern Pacific locomotives are being equipped with automatic track sprinklers, according to Geo. McCormick, general superintendent of motive power.

Practically all locomotives operated on the mountain district of the company's Sacramento division have already been equipped with sprinklers in continuous operation on all westbound trains between Blue Canyon, Summit and Roseville. Locomotives operated over mountain grades on the Shasta route are also sprinkler equipped.

Sprinklers extinguish sparks generated by heated brake shoes and greatly reduce possibilities of fires. The spray also keeps car wheels cool and adds considerably to the life of tires.

Old and New West Join in Eugene Celebration

Upper Left: Typical section of ballasted track on the Southern Pacific's new Cascade Line. Upper Right: Crescent Lake, one of the many beautiful lakes skirting the new line. (Below) E. T. McClamahan, veteran stage coach driver who will participate in the Eugene "Trail to Rail" celebration, August 19-20.

EUGENE, ORE.—The spirit of the old West will again be revived when the "Trail to Rail" celebration, marking the completion of the Southern Pacific's new Cascade line between San Francisco and Portland via Klamath Falls and Eugene, will be staged here August 19 and 20.

State, county and city officials, together with representatives of the Southern Pacific and the Interstate Commerce Commission will participate in the two-day celebration which is expected to become the most elaborate affair ever produced in Oregon.

A pageant "Klamath" depicting the evolution of travel from the early days of the Indians to the present time, has been written for

the celebration by Prof. W. P. G. Thatcher, of the University of Oregon. More than 3000 people will participate in the production.

Indians, cowboys, pioneer residents, lumberjacks, and all types of transportation from Indian "pole drags" to the modern locomotive and airplane, will participate in the picturesque parade which features the fete.

Irish Meeker, famous Oregon "Trail" pioneer, will have a leading part in the historical pageant. Captain O. C. Applegate and Cal Young, pioneer residents of Klamath Falls and Eugene, will also have leading roles.

Indian tribal dances by a group of Modoc and Klamath Indians is expected to be one of the popular features of the celebration.

Invitations have been extended by the celebration committee to Chambers of Commerce and other civic, commercial and industrial organizations of the state to participate in the celebration.

Prizes will be awarded for the most original and appropriate floats to participate in the parade.

The new Cascade Line is expected to be open for local train service early in September and through train service is expected to be inaugurated later in the year. However, special trains from the north and south will be operated over the new line during the celebration.

The new line opens up a vast area of undeveloped timber and farming land. It will lessen the distance between San Francisco and Portland by 23.7 miles as well as reduce curves and grades. Special reduced round trip excursion from all points on its lines in Oregon to Eugene will be put into effect by the Southern Pacific for the celebration.

SAN CARLOS NOTES

Mrs. Nels Jensen of Burlingame, sister of Mrs. William C. Johnson of Cypress avenue, was a visitor at the home of her sister and brother-in-law recently.

Mrs. Arthur Cooley of San Francisco was a visitor at the home of Mrs. Andrew Johnson.

Mr. and Mrs. C. Faget of San Francisco were house guests of Mr. and Mrs. Rupert C. Johnson. Mr. and Mrs. Steben McEvoy of San Francisco were dinner guests at the home of Mr. and Mrs. Ernest Richter on Sunday.

Miss Marian Gage, a recent visitor at the home of Mrs. J. Schneider of Walnut street, has left after spending a delightful visit and will visit with friends and relatives at Los Angeles.

Albert Marchio of San Francisco was a visitor at the home of A. Danemary on Tuesday evening. Miss Erna Richter who has been spending her vacation at Brookdale, returned to her home on Walnut street after a very pleasant trip.

Mr. and Mrs. Louis Wiener, formerly of Elm street, were the motifs for a delightful surprise party, the occasion being in honor of the Wiener from the east. Mah Jongg and music were the diversions of the evening and at the conclusion of the game delicious refreshments were served. The rooms were daintily decorated, yellow and white being the predominating colors used. Attractive favors and place cards were used to harmonize with the remainder of the decorations. Refreshments were in the form of a Dutch supper, and the guests seated around table included Mr. and Mrs. Rudy Rosenbergs, Mr. and Mrs. A. Levy, Mr. and Mrs. Fred Strauss, Dr. and Mrs. W. N. Jackson, Mr. and Mrs. William McKee, Mr. and Mrs. S.

Gross, Mr. and Mrs. S. Hodes, Mr. and Mrs. Fred Perfecto, Mr. and Mrs. Tom McConock, Mr. and Mrs. L. Lerner, Mrs. Ray Coney, Mrs. W. Innes of Stockton and Mr. and Mrs. Louis Wiener. All the guests were residents of San Francisco.

Friends of J. J. Johnson will regret to learn that he has been confined to his home on account of illness since May 30th. His condition the last few weeks is somewhat improved as he is able to sit up in an easy chair.

Mr. and Mrs. Joseph Schneider and Mrs. Mrs. Ernest Richter, both of Walnut street have left for their vacation in Lake county.

Mr. and Mrs. R. D. Schott and children have moved from their home on Elm street and will occupy their new bungalow in Burlingame.

Miss Helen Hindmann of San

Rafael is the house guest of her mother, Mrs. L. A. Hindmann at her home on Walnut street.

Mr. and Mrs. J. Olson of Turlock were house guests of Mr. and Mrs. William C. Johnson.

The executive board of the San Carlos Parent-Teacher Association met at the home of Past President Rosamond Gatchell on Tuesday to complete plans for their program for the new term. A very fine and interesting program was established by the board. The officers included Mesdames D. L. Stewart, James Whigham, William C. McElroy, Robert L. Simpson, O. D. Fairfield, Andrew Johnson, J. M. Edling, Lyle Clark, J. N. Davis and William H. Gatchell. Miss Mary Farnham is driving a new sedan.

Jack Read, son of Mr. and Mrs. H. L. Jones of Chestnut street, returned after spending the past two

weeks at Russian river and Lake county in company with his aunt and uncle.

Mr. and Mrs. John Munday and Mr. and Mrs. O. W. Stewart have returned from their vacation spent at Yosemite.

East Palo Alto

Miss Annie Johnson of Idaho Falls, Idaho, and Mrs. J. A. Lauer and son, Donald of Berkeley, former Idaho friends of the Frank Crowther family, passed a couple of days here this week.

Vera Harper is home from San Jose for a vacation.

Mrs. James Northon and little daughter, Georgia, are in Los Angeles for a visit.

Leland Merwin left Sunday for Los Angeles for a couple of weeks visit with relatives.

Mrs. W. P. Hatfield is in the U. C. Hospital in San Francisco. Harry Griffin had the misfortune to have his hand injured in the well boring outfit on which he was working the last of the week and is in the Palo Alto hospital, where a part of the thumb was amputated.

Mrs. A. C. Matteson returned Sunday from a vacation in the Big Basin.

Danny West is passing the week with relatives in San Francisco. Heber Epperson, the J. P. Netting family and Helen Crowther returned Monday evening from a motor trip to the Yosemite.

A deep water well is being bored in both the Sequerra and Huffman places.

Mary Jane Armstrong, who has been visiting at the W. A. McElhatton home, has returned home to Hayward.

Mrs. Hale Clippinger and son, Norman of Los Angeles, arrived Saturday for a visit at the E. Robinson home.

Mr. and Mrs. Henry Faber are happy over the arrival of a baby daughter born Sunday in the Palo Alto hospital.

Mrs. Altana Clark and Mr. and Mrs. W. B. Thompson of Salinas were visitors Saturday at the O. D. Wells home. Mrs. Wells returned home with them for a few days' stay.

CONSTRUCTIVE DEPARTMENTS OF A

The social and economic importance to California of constructive state trust service - and

THE trust department of this bank is a constructive educational work along the lines:

- encouraging the making of legally-sound Wills.
- pointing out the necessity of revising old Wills.
- warning the public against incompetent executors.
- proving the value of trust service.
- demonstrating the great commonwealth of California.

This work [now under way in 45 counties] has a distinct social and economic value to the great commonwealth of California.

MORE!

This company is now actively engaged in four major power developments that will provide electric energy at low rates for our growing number of homes, industries and farms. These developments will particularly aid the farmers. Water stored during the Winter will be released during the Summer and Fall when most needed.

Through business initiative and the aid of customer ownership, the company has been able to finance and develop these projects effectively and efficiently.

Rates are low in California—Service is a model for the rest of the United States.

Since 1913, the cost of living increased 65% while the cost of electricity decreased.

August 20th at the high school was held a meeting of the Parent-Teacher Association. All members are to be present.

G. G. Williamson and Mrs. G. G. Williamson were visitors at the high school. Mrs. H. A. Stein and daughter, Grace, and Mrs. G. G. Williamson were visitors at the high school.

Mrs. E. J. Montevideo and Mrs. E. J. Montevideo were visitors at the high school.

Mrs. E. J. Montevideo and Mrs. E. J. Montevideo were visitors at the high school.

PUBLIC SERVICE ASPECT OF ICE COMPANIES TO BE RECOGNIZED BY LAW

Ice companies will be classified with other public service organizations such as light and power companies through the impending passage of a state law in Oklahoma. This action by a state legislative body marks a further acknowledgment of the progress which has been responsible for the persistent upward trend in the production and consumption of ice despite the innovation of mechanical refrigeration.

As it was originally intended when "our forefathers brought forth this nation" and built up its constitution on a diet of laws, legislative action is supposed to reflect public or popular opinion. The domestic population of the country has gradually become aware of and noted certain worthy evolutions in the status of ice. The housewife has discovered that the preservation of food is largely a matter of well-iced refrigerators, that it has its place in increasing the palatability of foods and its possibilities in the preparation of foods. She has learned, in an era of domestic science, that commercial ice is purer than city water because of the process of filtration the city water is put through by the ice manufacturer.

The ice industry and its product have qualities that earn a place in a classification of service which ministers to the health and general welfare of the public.

Mr. and Mrs. Armand Naaslin and daughter, from San Francisco, spent Sunday with friends here.

Mrs. Frank Silva is visiting Mr. and Mrs. Forrest Gooding in San Francisco.

Dr. and Mrs. C. V. Thompson were visitors in Redwood City Saturday.

Mr. and Mrs. Earle Johnson and sons spent the week end with Mr. and Mrs. H. C. Stratton from Oakland.

Mrs. Clifford Byers and daughter, Rosemary, from San Jose spent a day last week with Mrs. M. R. Mattel.

Walter H. Moore was a San Francisco visitor Monday.

Mr. and Mrs. Thompson of San Jose received the prizes at the dance Saturday night, while Stella Ballard received the door prize.

Mr. and Mrs. Frank Kavanagh of San Mateo spent the week end with Mr. and Mrs. Ralph Woodman.

Graham McCormick left Tuesday morning to enter Santa Clara University. The best wishes of his many friends are with him.

Sealed bids will be received by the Sanitary Board of the Menlo Park Sanitary District, at the residence of John MacBain, Menlo Park, up to 8:00 o'clock p. m., August 26, 1926, for the construction of a six (6) inch vitrified clay pipe sewer, Menlo Avenue in Menlo Park, California.

All bids must be on forms prescribed by the Sanitary Board and bidding blanks may be obtained from C. L. Dimmitt, Lambert & Walter Building, Redwood City, California, engineer for the district.

MOVIES

GLORIA SWANSON'S FINE MANNERS COMING HERE

Do "fine manners" make "fine ladies"?

That's the question asked in Gloria Swanson's latest film, "Fine Manners," which arrives at the Sequoia Theatre next Monday and Tuesday, August 23 and 24. Gloria is seen as a dancer in a burlesque music hall. With a brother, who jealously tries to guard her from the world's tawdry influences, she lives in a tiny tenement apartment.

Then Fate—or call it what you will, has her meet a young, socially bored, society scion. He immediately falls in love with this veritable child of nature. Thinking to improve, and make her well high perfect, the youth tells his sweetheart that a course in "fine manners" will make her a "fine lady."

What happens? Certainly, this is a situation to bring forth lots of laughs and many perplexities.

Those who have already seen "Fine Manners," say that Gloria has never been better. Richard Rossan directed for Paramount. Eugene O'Brien plays the part of the fiance.

BOYS! BEWARE OF THE SHOW-OFF!

A chuckle-headed braggart, a conceited fool, a homo boobus, a cheap knave, an incorrigible jackass, a guffawing bluffer, a loud-mouthed prig, a mendacious bluffer, a garrulous four flusher, a glib faker, a gaudy liar, a bumptious ass, a Spanish athlete, a cocky big-talker, a cheap mountebank, an obnoxious windbag, a boasting boonder, a swanking posser, a megalomaniac, a hot-air artist, an egotist, swaggerer, blusterer and pretender; in other words—if others are necessary—a show-off!

Such is Aubrey Piper, the central character in "The Show-Off," the new Paramount comedy to be shown at the Sequoia Theatre next Wednesday and Thursday, August 25 and 26. Malcolm St. Clair directed the picture, which is based on the stage play of the same name by George Kelly.

From the description phrases mentioned above, it is to see that Aubrey is hardly a pleasant sort of fellow to have around, in fact, he is very much of a pest, and boys, from eight to eighty, are urged not to emulate him. Nevertheless, as played by Ford Sterling, he is an engaging personality, who arouses laughter and commands admiration by the sheer artistry of his braggadocio.

Elect I. M. Peckham, Associate Justice, District Court of Appeals, Political Adv.

NOTICE OF SALE

NOTICE IS HEREBY GIVEN THAT RICE AND HINTON will on August 30th, 1926, at 10 o'clock at Rice and Hinton Garage, 502 Main Street, Redwood City, San Mateo County, California, cause to be sold at public auction to the highest and best bidder in cash lawful money of the United States, one Hudson Speedster, Engine No. 106941.

The legal title of said automobile is held by R. C. MOORE of Oakland, California.

Said sale will be made pursuant to the provisions of Sections 3061 and 3062 of the Civil Code for the purpose of satisfying a lien upon said automobile in the sum of One Hundred and Fifty Dollars (\$150.00), which represents the reasonable value of the services rendered to the owner of said automobile by said Rice and Hinton, Redwood City, and R. C. Moore, Oakland, California, and for the purpose of satisfying the costs of said sale.

Dated August 12, 1926.

BEFORE THE BOARD OF SUPERVISORS OF THE COUNTY OF SAN MATEO, STATE OF CALIFORNIA

PETITION TO REORGANIZE MENLO PARK SANITARY DISTRICT UNDER SANITARY ACT OF 1923

To the Honorable Board of Supervisors of the County of San Mateo, State of California:

Now come the undersigned, each of whom is a resident and freeholder within the Menlo Park Sanitary District, and respectfully represent unto said Board as follows:

That the Menlo Park Sanitary District, the exterior boundaries of which are hereafter set forth, was organized under that certain act entitled "An act to provide for the formation, government, operation and dissolution of Sanitary Districts in any part of the state for the construction of sewers and other sanitary purposes; the acquisition of property therefor; the calling and conducting of elections in such districts; the assessment, levy, collection, custody and disbursement of taxes thereon; the issuance and disposal of the bonds thereof and the determination of their validity and making provision for the payment of such bonds and the disposal of their proceeds; to empower sanitary boards to make and enforce sanitary regulations and providing penalties for violations thereof," approved May 17, 1923.

WHEREFORE, petitioners pray that a hearing be had upon this petition; that due notice thereof be given in all respects as required by law, and that upon due notice given and proceedings had that said Menlo Park Sanitary District be reorganized under the Sanitary Act of 1923; and that such further order be made as to the board shall seem proper in the premises.

Dated this 12th day of August, 1926.

LEGAL NOTICE

NOTICE OF SALE

NOTICE IS HEREBY GIVEN THAT MENLO PARK GARAGE, Menlo Park, California, will on the 28th of August at 10 a. m. at Menlo Park Garage, Menlo Park, San Mateo County, California, cause to be sold at public auction to the highest and best bidder in cash lawful money of the United States, one Chevrolet Coupe, 1923 Model, License No. 807-617.

The known owner of said automobile is General Motors Acceptance Corporation, San Francisco, Calif.

Said sale will be made pursuant to the provisions of Sections 3061 and 3062 of the Civil Code for the purpose of satisfying a lien upon said automobile in the sum of One Hundred Dollars (\$100.00), which represents the reasonable value of the services rendered to the owners of said automobile by said Menlo Park Garage for towing and safe keeping said automobile and for the purpose of satisfying the costs of said sale.

Dated August 12th, 1926.

BEFORE THE BOARD OF SUPERVISORS OF THE COUNTY OF SAN MATEO, STATE OF CALIFORNIA

PETITION TO REORGANIZE MENLO PARK SANITARY DISTRICT UNDER SANITARY ACT OF 1923

To the Honorable Board of Supervisors of the County of San Mateo, State of California:

Now come the undersigned, each of whom is a resident and freeholder within the Menlo Park Sanitary District, and respectfully represent unto said Board as follows:

That the Menlo Park Sanitary District, the exterior boundaries of which are hereafter set forth, was organized under that certain act entitled "An act to provide for the formation, government, operation and dissolution of Sanitary Districts in any part of the state for the construction of sewers and other sanitary purposes; the acquisition of property therefor; the calling and conducting of elections in such districts; the assessment, levy, collection, custody and disbursement of taxes thereon; the issuance and disposal of the bonds thereof and the determination of their validity and making provision for the payment of such bonds and the disposal of their proceeds; to empower sanitary boards to make and enforce sanitary regulations and providing penalties for violations thereof," approved May 17, 1923.

WHEREFORE, petitioners pray that a hearing be had upon this petition; that due notice thereof be given in all respects as required by law, and that upon due notice given and proceedings had that said Menlo Park Sanitary District be reorganized under the Sanitary Act of 1923; and that such further order be made as to the board shall seem proper in the premises.

Dated this 12th day of August, 1926.

J. A. DONOHUE, PEIRY EYRE, IRA S. LILLICK, LAWRENCE H. COOK, EDMUND DOYLE

Members of the Sanitary Board of the Menlo Park Sanitary District.

Name Address

1. G. W. Moore, 1143 P.O. Box Menlo Park

2. H. Doughty, Menlo Park

3. Mrs. Jay T. Cooper, Menlo Park

4. Jean B. Hoss, Menlo Park

5. H. A. Chandler, Menlo Park

6. J. H. O'Keefe, Menlo Park

northerly line of said Middlefield Road; thence in a northerly direction parallel to and at all times five hundred (500) feet distant from the westerly line of said Middlefield Road to a point where said line extended across the Bay Road would intersect the northerly line of said Bay Road; thence in an easterly direction along the northerly line of said Bay Road to the place of beginning.

That your petitioners believe it is the duty of said Menlo Park Sanitary Board and all residents and taxpayers thereof that said Sanitary District be reorganized as a Sanitary District under the provisions of "An act to provide for the formation, government, operation, reorganization, dissolution and alteration of boundaries of sanitary districts in any part of the state, for the construction of sewers, septic tanks and other sanitary purposes; the acquisition of property therefor; the calling and conducting of elections in such districts; the assessment, levy, collection, custody and disbursement of taxes thereon; the issuance and disposal of the bonds thereof and the determination of their validity and making provision for the payment of such bonds and the disposal of their proceeds; to empower sanitary boards to make and enforce sanitary regulations and providing penalties for violations thereof," approved May 17, 1923.

That your petitioners believe it is the duty of said Menlo Park Sanitary Board and all residents and taxpayers thereof that said Sanitary District be reorganized as a Sanitary District under the provisions of "An act to provide for the formation, government, operation, reorganization, dissolution and alteration of boundaries of sanitary districts in any part of the state, for the construction of sewers, septic tanks and other sanitary purposes; the acquisition of property therefor; the calling and conducting of elections in such districts; the assessment, levy, collection, custody and disbursement of taxes thereon; the issuance and disposal of the bonds thereof and the determination of their validity and making provision for the payment of such bonds and the disposal of their proceeds; to empower sanitary boards to make and enforce sanitary regulations and providing penalties for violations thereof," approved May 17, 1923.

That your petitioners believe it is the duty of said Menlo Park Sanitary Board and all residents and taxpayers thereof that said Sanitary District be reorganized as a Sanitary District under the provisions of "An act to provide for the formation, government, operation, reorganization, dissolution and alteration of boundaries of sanitary districts in any part of the state, for the construction of sewers, septic tanks and other sanitary purposes; the acquisition of property therefor; the calling and conducting of elections in such districts; the assessment, levy, collection, custody and disbursement of taxes thereon; the issuance and disposal of the bonds thereof and the determination of their validity and making provision for the payment of such bonds and the disposal of their proceeds; to empower sanitary boards to make and enforce sanitary regulations and providing penalties for violations thereof," approved May 17, 1923.

D. E. O'KEEFE, being first duly sworn, deposes and says: That he is one of the petitioners named in the foregoing petition to reorganize the Menlo Park Sanitary District under the Sanitary Act of 1923; that he has read said petition and knows the contents thereof, and that the same is true of his own knowledge except as to matter therein stated upon information and belief and as to those matters that he believes the same to be true.

D. E. O'KEEFE

Subscribed and sworn to before me this 12th day of August, 1926.

(SEAL)

W. J. MURRAY, Notary Public in and for the County of San Mateo, State of California.

NOTICE IS HEREBY GIVEN, that the foregoing petition will be presented to the Board of Supervisors of the County of San Mateo, State of California, at the chambers of said board in the county court house at Redwood City, California, on Tuesday, the 7th day of September, 1926, at the hour of 10:30 o'clock A. M. pursuant to the terms of the Sanitary Act of 1923, Statutes 1923, page 393 and that any and all persons interested therein may then and there appear and be heard in said matter.

First publication in Times-Gazette August 14, 1926; August 21; and last publication August 28th, 1926.

CHAPTER XIV

You Yankees!

When Caleb had discovered the weakness of the rock in Hermanos canyon he looked for another dam site and his intuitive caution had closed his mouth in the matter until Baxter's treachery had sent him on his visit to El Nido the day that Clinton died, ready to make explanations that he felt would exonerate him from Baxter's charges.

He had discovered his alternative in Boca-Blanca basin. Caleb's eyes had seen its possibilities the day of the barbecue and later investigations convinced him that here was his site, better in some ways even than Hermanos. Two creeks ran through it, for one thing, the slopes drained more gently but with sufficient pitch. Clearance work presented no alarming problems or cost.

It was a month after Baxter had been warningly dismissed by Cox that Hincley, paying flying visits to his offices between field trips, came into the room where Caleb bent over his drafting and slapped him on the back. "I've finished my report to the board of directors, Warner," he said jubilantly. "Dictated it this morning. It's entirely favorable. They meet the day after tomorrow. I understand they've practically completed the options for the watershed. All they now have to do is to vote money for purchase and our end of it and then—it's up to the pair of us!" You've earned your hundred thousand dollars, which, I imagine, will be vouchered tomorrow. I wanted to be first with my congratulations. I haven't given you any the best of it in my investigations. Hey, but I'll be glad to buckle down into the harness again! Will you come up to the house to dinner tonight, and talk over things afterward?

Caleb assented gladly and Hincley said good-by. He had been gone but a few minutes when a boy arrived with a request for Caleb to see Mr. Cox.

Cox opened the conversation to the point without preamble. "You've seen Hincley, Warner? Then you know that his report is favorable. Now, then, we could close up the whole matter at the meeting tomorrow and pass appropriations, but for one thing."

"That's the purchase of the Boca-Blanca basin. We can't get option or purchase price on it out of Wharton, who was handling it. He's stalled me off till yesterday for some reason and I don't like it. He has recently sold it and he says that he has instructions not to disclose the name of the purchaser. Part of the provisions of the deal. We've got to have it to complete the project. You know that. I did not imagine there would be any difficulty. It's valueless land and no one but an engineer would ever imagine it as a reservoir site. Unless there have been more leaks. Did you ever get any line on who owns Boca-Blanca? You found out the owner of the Caliente gravel beds."

"I own the Boca-Blanca basin," said Caleb quietly.

"You do?" Cox's left eyebrow went up.

"I expected to tell you as soon as I knew that Hincley's report would be favorable. Otherwise my investment would be useless except for reality."

"Your investment?" Cox laid down softly the pencil he was balancing and subjected Caleb to a searching scrutiny. His demeanor changed. All friendliness left it, the president's face hardened, his jaw shot out and his eyes became again the color of ice in shade.

"How much do you want to make on your little investment?" he demanded.

"I paid ten thousand for the whole valley, bottom to hilltop," said Caleb. "Six thousand in cash—four thousand on a mortgage secured by a five-year note at six per cent interest."

"I'll turn it over to the company for exactly what it has cost me as soon as my agreement with you is duly ratified upon the acceptance of Hincley's report. I was in a position to get hold of this property when there was no chance of its value being lifted, at a low price, and I took up the opportunity. I have always intended to deliver it to the company when my own deal was closed."

Cox's face showed faint signs of relief, his eyes were still keen but now they held a quizzical light.

"When your own deal was closed? Had an ace in the hole all the time, eh, Warner? It was you I underestimated. It isn't so often that you find an engineer a first-class business man. You'll go far, Warner. Part of the way with us, I'm glad to say."

Caleb flushed a little.

"It was hardly an ace in the hole," he said, "since I expected to play it with your hand. I felt that it was a business measure to protect myself, Mr. Cox. I did not doubt your sincerity, but . . ."

"It was a d-d smart move, Warner. You didn't know us. You Yankees!" he chuckled. "I appreciate it, personally and for the company. I mean your turning it over as you will. You could have held us up for a stiff profit and that, too, would have been business. But your New England conscience walks hand-in-hand with your New England forehead. You should play a good game of chess. Gad, you've taken a weight off my mind! Wharton and Baxter being so close I began to think that grasshopper had

cooked up something, after all. But you blocked it too early in the game, even if he thought of it.

"Tomorrow will see you with your check in hand for a hundred thousand dollars. If you want to invest that in our new stock issue, Warner, I'll see that you can get a block of it. It's coming to you. How about it?"

"I'll think it over, with full appreciation of the offer," said Caleb. "After this project is completed I may want to use my capital in a hurry."

Cox was all cordially again. It was plain that Caleb's protective purchase of the key to the project appealed to him.

That afternoon Caleb took his deeds to Boca-Blanca out of his safety-deposit drawer at his bank. So far he had won a third of what he desired—the price of his discovery. Now came the work, the enduring sign. There still remained Betty Clinton.

CHAPTER XV

The Work

The rains came sheeting down with blustering winds or days of steady downpour. Caleb was astonished that California weather could be so wild. But they worked. Tarpaullins could keep out the rain, there was no frost, bane of the builder in cement and of the excavator. Caleb dug deep into the gravel beds, although the creeks were running wild, and he was forced

Later Investigation Convinced Him That Here Was His Site.

to halt at thirty-five feet and wait until spring brought a lowering of the water table to level. He pushed work on the submarine piping. Men swarmed like ants, in busy multitudes. As the work proceeded toward completion Caleb still found the project good. By June the company began to talk of a ceremonial opening. There would be a picnic-de-luxe, an elaborated barbecue, speeches, general inspection of dam and filtration system. All this was set for August, after a year's top-speed toll.

Caleb was seldom away from the actual scene of labor, he had not seen Betty Clinton, he had seen no one who might have seen or heard of her, but it was not often that thoughts of her were absent from his leisure hours, which were few and apt to find him mentally and physically tired and drowsy.

The year of her mourning would be up with the opening of the works. He hoped—or he would not have dreamed. He hoped to go ahead for the next adventure with Betty, to find it for themselves and work out its problems together.

He realized that there had been a change in him. He had expanded and he was no longer the self-contained young engineer who had worked on

Claims to Have Found Life in Meteorites

A startling discovery by two French scientists, Messieurs Gallipie and Souffend, may have even more startling results if their investigations are pursued. They submitted a number of meteorites to microscopic research, and assert that in some of the specimens they found life germs which showed definite signs of vitality and development when placed in culture tubes.

The late Lord Kelvin once put forward the theory that the origin of life on the earth was due to germs brought here from other planets by meteorites. Few scientists agreed with this daring surmise, the chief objection being that no form of life could survive the intense cold in space.

"It was hardly an ace in the hole," he said, "since I expected to play it with your hand. I felt that it was a business measure to protect myself, Mr. Cox. I did not doubt your sincerity, but . . ."

"It was a d-d smart move, Warner. You didn't know us. You Yankees!" he chuckled. "I appreciate it, personally and for the company. I mean your turning it over as you will. You could have held us up for a stiff profit and that, too, would have been business. But your New England conscience walks hand-in-hand with your New England forehead. You should play a good game of chess. Gad, you've taken a weight off my mind! Wharton and Baxter being so close I began to think that grasshopper had

the projects in New England, beside which this present affair was enormous. He had glimpsed the human side. It was no longer so many yards of excavation, so much concrete, so much flow, levels, logarithms, trigonometry. The personal had entered into the mechanical.

He did not hire the men under his charge. That he left to the company's superintendents and foremen. But he tried to know each by sight and greet them with a nod that recognized them with himself as partners in the work, each according to his measure, capacity. A labor camp had been established in the Sink under canvas and light lumber, bunkhouses, dining rooms and a few concessions all under strict supervision of the company.

It was on Sunday when Caleb, riding over to meet Hincley at the big dam, passed a man coming out of a little store that carried stationery, candy, tobacco and newspapers and magazines. He had a paper bag tucked into his side pocket, from which he abstracted a sweet morsel for his mouth as Caleb, astride a horse in preference to the car provided by the company, went by him. The man was far from neat, though he wore a linen collar. His clothes were of unusually good material, but they were all out of shape and stained. There was a lack of spirit in the man's carriage that arrested Caleb's attention.

Caleb looked sharply at him. He saw a profiled face framed in an untrimmed beard, a face that was shrunken from sickness or dissipation, a shifting glance of moody eyes, features that seemed remotely familiar.

The sense of having seen the man before persisted and, when Caleb met a foreman, who saluted him cheerily, he drew rein. The man was still in sight.

"Does that chap work for us?" asked Caleb. "I haven't seen him about before." The foreman shaded his eyes.

"He came two weeks ago with a recommendation from McCarthy, the contractor, to Mr. Burns. Burns was needin' a timekeeper. He put him on. Name of Johnson. He turns in his sheets well enough. A lushound gone on the blink with prohibition."

"Well, good luck to you," said Caleb and put his horse to a gait.

McCarthy's name had given him the clue. He was sure Johnson was Baxter. He had heard rumors in his frequent visits to Golden and the club of the latter's downhill progress. Still drinking bad liquor, borrowing, ejection from the club for a heavy bill, attempts at curbstone real estate, deals in insurance given him by friends, talk of misappropriated premiums and renewal checks, smoothed over for old times' sake.

Caleb's resentment had died out with Baxter's downfall. All that Baxter had attempted against him had ended in failure. If he was attending to his job Caleb did not want to hound him on still lower. But he did not think Baxter's rehabilitation probable.

He kept him in mind until he returned. Then he sought Burns. Johnson's—or Baxter's—record was good enough.

"He's been a hoozer," was the supervisor's report. "So far he's kept sober. Want him laid off?"

"Not so long as he keeps off the stuff and turns in correct sheets," said Caleb. "But, if he's drunk, or you think he's carrying liquor, inside or out, fire him. Treat him under the rules the same as anybody."

Two days later Caleb was called to Golden for a conference. As he strolled along, looking in the store windows, his eyes were caught by a placard announcing an exhibition of paintings by Juan Carquinez, canvases of Mexico. Caleb, remembering the picturesque, forceful figure of Carquinez, thought that he would like to see how the man could paint. It would pass an hour pleasantly.

The gallery was a small one. Caleb saw Carquinez talking with a group of three possible patrons, his strong face as mobile in its earnestness as his gestures.

A little pile of catalogues stood on a table by the door and Caleb took one, making the round of the walls, slowly, held before canvas after canvas by the beauty of the work.

Caleb became obsessed with the desire to own one. The name of it was "La Tenaya," and his Spanish was insufficient to translate the word. On a lift of ancient lava that rose in the foreground, looking out across a dusky plain to a line of hills that held the rose and purple of a dying sunset, three Indian women were drawing water from a pocket cistern in the rock, lingering to exchange their simple gossip. A custom as old as the hills themselves, the drawing of water at sunset for the evening meal. It made strong appeal to Caleb, aside from the exquisite painting and tone value of the canvas.

(TO BE CONTINUED.)

The Radio Announcer's Job

VERY art has its critics, especially the young arts. For thirty-seven years they have been slandering and praising the movies, and for the last five years they have been giving some of this attention to radio.

With radio a large share of this attention has been given to the announcer. "The news cabled from Great Britain that radio announcers there are to be given a course in pronunciation is no doubt gratifying."

But the course should go much further than pronunciation. "The announcer's chief fault, indeed, is not his pronunciation at all, but his intolerable tediousness; he is overly addicted to comment. It seems impossible for him to make his announcement thus: 'For the next number Mr. Reinald Werrenrath will sing Danny Deever, the poem by Rudyard Kipling, the music by Walter Damrosch.' He must indulge in a potter of witless musings of his own, this way: 'For the next number . . . Mr. Reinald Werrenrath will sing for us . . . Danny Deever. . . As we all know . . . this is the celebrated song . . . about the execution of a British Tommy . . . who had committed a murder . . . and was sentenced to be hung . . . to be hanged, rather. The words by Rudyard Kipling, the well-known English writer; the music by Dr. Walter Damrosch . . . of the New York Symphony orchestra . . . whom you have heard many times . . . as his concerts are frequently broadcast . . . I am sure we shall all enjoy the song a lot . . . as it is one of the best-known songs we have . . . and Mr. Werrenrath is one of our popular American baritones . . . and I am sure we are all glad to have him with us this evening . . . And now . . . Mr. Werrenrath.'

Analyzing this, which is surely not an unfair specimen, one is struck by two facts:

"(a) That anything bearing the qualification 'as we all know' had just as well be left out, since what we all know needs no repeating; and

"(b) That what the announcer is sure of in saying how glad we are to have Mr. Werrenrath with us, and how well we are going to enjoy ourselves, is of no significance to any one.

"If the broadcasting stations would give their announcers a few lessons in brevity and how to achieve it they would add to public enjoyment approximately 750 per cent."

Radio announcing, of course, is a new profession. Broadcasting on an organized basis was only five years old in July, 1923, hardly an ample period in which to develop to the fullest any satisfactory code of procedure for announcers to an unseen audience.

But much progress has been made, and criticism and suggestion from those best qualified to know, namely, the listeners-in, gradually is shaping a course for the announcer who would please the majority of his audience. The demand for competent announcers continues to grow, and last year New York university established a course in its extra-mural division. Instructors in public speaking are in charge together with directors in the National Radio Voice service.

Possession of a good radio voice and the technique for its proper use are taken for granted, but having the voice and knowing how to use it, the announcer is far from exhausting the catalogue of abilities he must display, declared a writer recently in the New York Herald-Tribune.

Polite and presence of mind are absolute requisites for the announcer, he continued. When any one of a dozen possible mishaps occurs, he must

Every evening a large piece of bread, and cheese or butter, whichever we choose. For dinner, on Sunday, and butter and milk and water; Tuesday, roast mutton; Wednesday, bread and butter and milk; Thursday, boiled beef and broth; Friday, boiled mutton and broth; Saturday, bread and butter and peas porridge. Our food was portioned out, excepting on Wednes-

days, I never had a bellyful. Our appetites were damped, never satisfied and we had no vegetables." In those days the authorities had never heard of vitamins; but if they had, it sounds as though they would have extracted them.

"Whipping the Cat"

In colonial days an apprentice who had completed his term of service in learning the shoemaking trade usually started out in business in a manner that was known as "whipping the

be prepared to explain what has happened and why. The fault may belong to some other person, but the announcer must shoulder the blame himself and make the invisible audience like it. There may develop, through unforeseen circumstances, a period of silence beyond the usual amount.

He should be able to fill in the gap without stuttering or swallowing his words, and without speaking nonsense and repeating it. He must be possessed of a wide knowledge, so that when Jeritza is about to sing he may speak in terms of grand opera, and when Paul Whiteman is about to lead his jazz band he is able to discuss syncopation in terms of George Gershwin and the modern trend of popular music.

When speakers come before the microphone, he should be able to relate the subject of their discourses to current events of the day as reported in the newspapers. Yet, the announcer must not encroach upon the time of the broadcaster nor divulge too much of the contents of his address.

A well-known announcer told of an incident which marked his early efforts before the "micro." He was to introduce a senator, who was to speak on the settlement of international debts. The announcer, at that time very new to his profession, was excited both over the fact of the senator speaking and the topic of his address. Desiring to impress the audience with the significance of the occasion, he said, after naming the speaker and subject, that both were important; really, very important, and in fact—

"The stake of nations is at fate."

The director of the station nudged the announcer, who realized he had been guilty of a slip of the tongue and hastened to correct himself.

"I meant, of course," said the flustered young announcer, "that the fate of nations is at stake." This time he himself sensed his error, and he floundered into a new correction—

"That is, the state of nations is a fake."

Finally the senator kindly took it upon himself to extricate the announcer from his difficulties and explained there was nothing more serious pending than that the fate of nations was at stake.

Although radio announcers and lecturers have some problems in common with the platform speaker, such as audience psychology, those who take the air for their addresses must give special attention to voice training. It was found. The experience of the air college conducted by New York university was that the voice, rather than the subject, was potent in attracting the huge audience.

While a platform speaker has his audience at his mercy, even if his voice is un pleasing, the radio lecturer's audience, it was quickly learned, may leave him for a more pleasing speaker, without having any charge of impoliteness brought against it. The university report read, in part: "Although the radio speaker is unable to see the effect of his words, he soon learns that the tones, speed and variation of his voice are of far greater importance to him than to a platform speaker, and professors who wished to attract large numbers to their classrooms soon learned that they must abandon what has frequently been referred to as the classroom manner of speech."

Students in that course were taught the technique of good radio delivery, the construction and rhetoric of the radio speech and the specialized vocabulary necessary for the radio speaker. A feature of the laboratory course was a voice-recording outfit which sends back to the student his voice as it sounds to his radio audience.

With all due respect to the university profes-

cat, I never had a bellyful. Our appetites were damped, never satisfied and we had no vegetables." In those days the authorities had never heard of vitamins; but if they had, it sounds as though they would have extracted them.

sors, and believing that they perform work, we must nevertheless learn that the best radio announcers, like actors, are born, not made. This means a long and arduous training, but the student must not think that his courses if he wants to work with him more than just four weeks.

There is an instinct about announcing which is a theatrical quality in the speaker to sense the reactions of the audience as clearly as the actor knows his words. To state the case more fully, an announcer must not only be an actor, but he must be an artist himself.

Nothing will antagonize an announcer more quickly than the slipshod manner in which his words, speaks too fast or too slow, sentences, and who fails to enter into the occasion. With an announcer of this station might as well close up shop. The sophisticated radio man will have nothing to do with it.

There was a reception in progress at an avenue hotel at which the host of famous world-famous musicians. There were dressed guests, among them the principal concert artists and conductors in the city.

One of these guests, not a musician, an announcer by surprise and pushed into the microphone. Taking the stand he said: "Ladies and gentlemen of the audience, among the celebrities here is Mr. B. He is in the play in which starred. Now, Mr. V. in reality is the real star of the play, although the credit, is Mr. B. Don't forget you go to see the play."

Mr. B., who is a gentleman as well as a rate artist, was visibly and extremely embarrassed by this unsought advertising, which might have proved a boomerang. He had, however, regained his poise and guest who had just spoken, expressed gent tones that the speaker had been under the weather, whether from rain he could not say.

The announcer continued further that Mr. W. was deservedly the star of the night, which did not diminish the value of acting, and he briefly restored peace to a natural sentence or two. Mr. B. regained his composure, the intruder was effusive in his lesson, and the broadcasting continued uninterrupted for the balance of the night.

This announcer would be worth a lot in gold. Of the several hundred people in the hotel ballroom only the three or four who were in the microphone knew at the time what had happened. But the incident must have been heard by hundreds of thousands of listeners, for the words more distinctly than those at the end of the dance floor.

There is at least one situation in which the greatest announcer in the world would sell up a tree. That would be a case where a famous actor appeared before a microphone. Just what would he expect from a microphone? He would expect from a microphone no one could know, and the such thing would occur as was the New York Herald-Tribune recently by correspondent.

His report read: "Universal and the denunciation—a new experience for George Shaw in recent years—greeted the denunciation of a Shaw play and the radio when a melodramatic skit, The Play, was broadcast."

"The skit, which has for a climax the hero through swallowing a large quantity of pills, was greeted as the worst play, made worse by radio. Shaw was years ago for a garden party, and his radio to broadcasters was probably another of his 'hoax'."

It will not be surprising if Mr. Shaw unexpectedly the writing of a play, in a dramatic dress, calculated primarily for casting over the radio.

DEBONAIR VAGABOND FELTS; BEACH WEAR IS PRACTICAL

THAT something new in millinery, always due to appear for late summer, has arrived this year in force. Shop windows and promenades are full of gay emigrants from Paris—newly arrived and very captivating. Light felt hats, to be worn with the lightest dresses and sporty outfits, and probably destined to disappear in darker colors, or brighter ones, for fall. These are the "vagabond" hats with which summer is ringing down the curtain on the best performance in millinery for several years. They are only successful in fine qualities and are made with narrow or medium-wide, floppy brims in light tans, gray, pale rose, pinkish tan, ivory, putty color, and other delicate shades. Usually they are trimmed with rib-

Some Emigrants From Paris.

bon but they cannot be described as simple, for the trims are intricate and the ribbon sometimes a bit gorgeous, when gold or silver metallic patterns are used. The group of late summer hats shown here includes four felts of the vagabond type and one French sailor in straw. Both the smooth, creamy felts and the rougher "scratch" varieties are shown in the new shapes. The group lends off with a narrow-brimmed model that flares upward across the front and left side. The crown is draped with ribbon collar and ornament which is placed at the right side. The French sailor, in natural straw color, has its brim edge bound with narrow gilt braid, and this binding is repeated on the ribbon collar and buckle made of ribbon. A

Practical Wear for the Beach.

small shape that hints of the vagabond type has a handsome collar about the crown, made of overlapping lengths of velvet ribbon and is finished with a small ornament at the front, but very vagabondish in its neighbor with a wide crown, brim widened and turned up at the back. A ribbon collar and a rosette, made with irregular valais, trim it. A similar shape with two ridges in the crown is content with a flat ribbon collar finished with groups of plaits at the side where two small cabochons made of strips of felt are placed. It does not take long to tell the story of that most essential article of beach wear—the bathing suit. It is a play, in every particular. Apparently all the world that goes to the beaches

Hats of Milan Straw
Each week emphasizes the importance of the large hat of milan straw. It is perhaps most effective in black but dark blue, beige and a shade of burgundy red are unusually attractive.

Sophisticated Touch
Chiffon frocks for evening are given a substantial weight by being quite covered with embroidery in jewels or strass.

Decorative Sleeves
Very wide sleeves of lace or chiffon or very much embroidered or decorated materials are frequently the only attempt at trimming on the new black satin gowns.

Shades of Chintz
A different version of the chintz shade is not plaited but is made of pieces cut to make a perfectly smooth straight shade bound with colored linen tape.

THE KITCHEN CABINET

Your dreams are the wealth of your spirit, the goal. The ideal you long to attain. The radiant vision that gladdens your soul. The hope that illumines the years as they roll. And robs them of sorrow and pain.

HINTS AND THINGS

If fond of oysters add a little oyster liquor to tomato bouillon; it greatly improves the flavor. Lay a cold cloth dipped in cold water over the bottom of a cake tin—the cake will be removed much easier. Dry bits of cheese put through the meat grinder and mixed with boiling-hot cream, a dash of cayenne, will make a good cream cheese to serve in various ways. Spread on crackers and served with a salad it makes a good luncheon dish.

When roasting meat a teaspoonful of sugar added to the water when basting adds flavor as well as color to the roast and gravy. Always dry graniteware away from the heat, as it will chip and crack; often bits will get into the food in this way.

If a child should get any foreign substance up his nose, do not try to probe for it, but put a bit of pepper or snuff on the lip under the other nostril; he will sneeze and dislodge the obstruction, unless firmly lodged. In such case call a physician. Blowing up the free nostril is often a help, if the object is not too tightly lodged.

Keep old stockings legs to slip on the arms when cooking to save good dress sleeves, or use them for covering legs of chairs or tables when moving. Cut into two-inch strips, silk stockings of various colors are crocheted or woven into pretty covers for cushions.

Cover the ticking annuity at night. The time can be seen without the disturbance of the noise. When washing greens add a handful of salt to the water. It will dislodge any insects that may be clinging to the leaves.

Zinc filings or small pieces of zinc placed on the coals in a grate or furnace will clear the chimney of soot. A tablespoonful of vinegar added to stews of meat that are tough seem to soften the tough fibers wonderfully.

Summer Dishes. During the hot weather the meat supply should be cut down. If there are mushrooms to be had from the fields one need not miss having appetizing meats.

Tuna Fish With Mushrooms.—Take two cups of tuna fish, one cup of thin cream, one teaspoonful of butter, one-half teaspoonful of salt, a few dashes of cayenne, a grating of nutmeg, two cups of mushrooms cut into dice and cooked in butter five minutes, one cup of white sauce and a tablespoonful of minced parsley. Add the mushrooms to the tuna, the cream and the seasonings, stir in the butter and simmer 15 minutes. Serve on buttered toast and pour the hot, well-seasoned white sauce with the parsley added, over all.

Queen of Bread Pudding.—During the summer when bread moulds quickly, various puddings and au gratin dishes may be made occasionally. Take one pint of milk, one pint of bread crumbs, the yolks of two eggs, one cupful of sugar, a tablespoonful of melted butter, the rind and juice of half a lemon. Beat the whites of the eggs very stiff, add two tablespoonfuls of powdered sugar. Cover the pudding after mixing with a layer of sugar and lemon juice and rind, then cover with the meringue and bake until brown. Serve with cream or a hard sauce.

Cottage Cheese With Lettuce.—Heap creamed cottage cheese on fresh crisp lettuce, top with a spoonful of good bottled dressing and garnish with a cube of jelly or a bit of preserve. Sprinkle with chopped nuts if desired.

Best Lima Beans.—Take two cups of fresh lima beans, add one medium-sized green pepper, one onion and one carrot, chopped. Cook in boiling water until tender, then salt, reserving when draining one-half of the liquor. Melt two tablespoonfuls of butter, add two tablespoonfuls of flour, pepper and salt to taste, then add one-half cupful of the liquor and the same amount of milk; cook until smooth, pour over the vegetables and serve hot.

Veal Birds.—This is a dish that is especially enjoyed in summer: Have a slice of veal cut from the leg. Pound it until thin, cut into strips and place on each a spoonful of seasoned crumbs. Roll up the strips, tie or skewer, dip into seasoned flour and fry until well browned; now add a cupful or more of thin cream and simmer for half an hour. Serve with the skewers removed and the sauce poured over the birds.

Satire in Poetry and Prose
It is a matter of opinion whether or not satire is more effective in poetry or prose. One of the reasons why it is said to be more effective in poetry is that poetry remains longer in the mind than prose because of the rhyme.

Hard to Forgive
It would be much easier to love your fellow man if he didn't hank to get by and then slow down.—Washington Post.

1 in every 4

DURING the first six months of 1926 one in every four buyers of new automobiles bought a General Motors car. During 1925 the proportion was about one in five. During 1924 it was one in six. This steady addition of new friends for the products of General Motors has a double significance.

1. It is proof that the grouping of strong companies in one big family is economically sound. Large scale operations do make possible important economies; and these economies do benefit the buyer, in greater value. The public has recognized this principle and profited by it.
2. Increased public patronage involves increased obligation. General Motors is directly responsible for the welfare of its 152,000 employees and their families, its 20,000 dealers, and indirectly for the six thousand companies which furnish it with supplies and materials — at least a million men, women and children to whom its public good is a very personal concern.

As the volume of production increases there must be a corresponding increase in the values offered. The new series of cars just presented does embody larger values; it is a direct reflection of the fact that more than 1,075,000 General Motors cars were sold at retail during the year just closed. The added quality has been built in where its presence counts most in comfort and safety and long life.

With great pride we invite you to inspect these new General Motors cars.

Reason for Impoliteness
Mannish-dressed Lady—Did you catch any fish, little boy?
Country Boy—No.
M. D. L.—No, what?
Boy (gazing dubiously at her rig)—Durned if I know.

"Cantaloupe" is a new color in England for women's dresses and is worn with bronzed hats and bronzed shoes.

ALLEN'S FOOT-EASE

For Tired Feet It Can't Be Beat

At night when your feet are tired, sore and swollen from much walking or dancing, sprinkle two Allen's Foot-Ease powders in the foot-bath, gently rub the sore and inflamed parts and relief is like magic. Shake Allen's Foot-Ease into your shoes in the morning and walk in comfort. It takes the friction from the shoe. Sold everywhere. For FREE Sample and a Foot-Ease Walking Doll, address, ALLEN'S FOOT-EASE, L. E. Roy, N. Y.

By the Forelock
Mrs. Charles Murray, the "oil queen," said at a reception: "Yes, it is true that I'm the only independent woman oil operator, and it's true that my company has been paying 600 per cent dividends. 'Success? Well, to succeed nowadays you must be very quick—take time and everything else by the forelock—like the young man at the seashore.' 'Darling,' the young man said to a girl with whom he was sitting out a dance, 'darling, I love you.' 'But,' said the girl, 'my goodness me, we didn't meet till half an hour ago.' 'Yes, I know, darling,' said the young man, 'but I'm only down here for the week-end.'"

Cuticura Soothes Baby Rash
That itchy and burn, by hot baths of Cuticura Soap followed by gentle anointings of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each.—Advertisement.

Donor Hides Identity
A man, whose only identification is his statement that he was born in England but has lived in the United States for the last fifty years, recently sent Winston Churchill, chancellor of the exchequer in England, bonds to the value of \$6,850, to be applied to the reduction of the Anglo-American debt. This is the third donation sent by the man in the last three years as a contribution toward the English war debt. Churchill was unable to write the man through lack of address, but publicly thanked him through the press.

Ship Has Nine Decks
Recently the "Le de France" was launched in France and when completed will be one of the biggest vessels of her type afloat. She will have nine decks or about the height of a 12-story building. The Le de France will be a 40,000-ton vessel. Heretofore France, in her maritime enterprises, has gone in for elegance and comfort in her passenger ships.

News of Menlo Park

Portola School Opens Monday
The Portola grammar school will open for the fall term next Monday with an increased attendance.

Native Daughters At New Menlo
Next Friday evening, August 27, Menlo Parlor N. D. G. W. will be in charge of the New Menlo Theatre. The feature picture on that occasion will be "Three Weeks in Paris." Vendome Parlor of San Jose is to put on a vaudeville show of high character that will be well worth going miles to see. The show will consist of songs, monologues and dances. Come and see this show.

Stuart Middleman Passes Away
Stuart Middleman, who maintained a palatial home on Oak Grove avenue, near the Middlefield road, passed away at his apartment in San Francisco last Sunday, following a brief illness from pneumonia. He is survived by his widow, Evadne Brickell Middleman, and two brothers, George E. and Harold Middleman of San Francisco. The deceased was a native of San Francisco and was aged fifty years. He was a man of sterling worth and character and was beloved by all who knew him. During his residence in Menlo Park he made numerous friends who deeply mourn his untimely demise. Mr. Middleman was wealthy and leaves a large estate. His widow has the sympathy of the community in her bereavement.

Born—A Son

Born—To Mr. and Mrs. Earl S. Douglass of Menlo Park in San Francisco Saturday, August 14, a son, Mr. Douglass is a former Stanford man, a son of Mr. and Mrs. Leon Douglass of Menlo Park. His wife was Miss Noel McGittigan of San Francisco. They are building a residence in Hillsborough and expect to occupy it about October 1.

Will Return To The City

Folk Maginnis, the Southern Pacific traffic manager, who has been occupying the Laurel Court all summer, will return to the city next week. During his short time here he has made many friends and all regret to see the family leave Menlo Park. Laurel Court has been leased for a term of three years to Major Parks, who will conduct a military academy there. The place will be open for inspection on September 1st. The rear portion of the estate is to be transformed into a military and parade grounds. Major Parks has many applications for admittance to the institution.

Well Known Evangelist

Leaves Cottage
Miss Josephine Chase, the well known evangelist of San Mateo has leased the J. H. O'Keefe cottage on the highway for a period of one year.

Spending Vacation Here

Arthur Fowle, the well known policeman of the San Francisco police department, is here with his charming wife on his annual vacation.

To Erect Building On Highway

Krauer and Lillo, owners of the Triumph Cafe, have begun the erection of a one story building on their property on the highway across the way from the cafe. Later the firm may occupy the building and conduct the cafe.

L. H. Cook Moves To Redding

L. H. Cook and family have moved to Redding where they may remain for some time. Mr. Cook is operating a mine in that locality.

"The Unguarded Hour"

"The Unguarded Hour" will be the feature picture this evening in the New Menlo Theatre with Al St. John in "Skybound," as the comedy. Tomorrow evening "Say It Again" will be presented with "The adventures of Mazie," with a comedy, "Somewhere and Somewhere," Monday and Tuesday evening next "The Blind Goddess" with Jack Holt and Ernest Torrent, comedy "Meet My Dog."

St. Joseph Card Party

Next Wednesday evening in Duff and Doyle hall St. Joseph Alumni will hold a card party. The date was originally set for Tuesday but the Alumni found that another event is scheduled for that date so they decided to hold it on Wednesday. Fifteen prizes will be offered the winners.

Mrs. Tuttle Passes Away

Mrs. David Tuttle of Palo Alto passed away after a lingering illness at Santa Clara on Tuesday evening. Mr. and Mrs. Tuttle and their son moved from here to Palo Alto some years ago after a residence in Menlo Park for a long period. Their son David graduated from Santa Clara College as an electrical engineer and has for several years been employed at the C. N. Felton estate for many years. The family was well known in this section. The deceased was a native of Ohio. Mrs. Tuttle was a true Christian woman, living only to do good and to follow in the footsteps of her Divine Master with whom she is to dwell for all eternity. The remains were placed away in Holy Cross cemetery, Menlo Park, yesterday.

Food Sale This Morning

This morning in the Murray building the Senior Christian Endeavor Society of the Presbyterian church will hold a food sale of choice home-made pies and cakes. A bevy of pretty girls will offer these articles for sale. The proceeds are to go towards the fund to paint the church building on Santa Cruz avenue. Everyone should be as generous as possible to this worthy cause.

North Palo Altos Hold Picnic

Sixty-five members of the North Palo Alto Residents' Association and their families gathered at the Piers ranch, back of Stanford Sunday for a picnic. Lucas Greer was in charge of the barbeque. Beans and icecream were also served. A baseball game, horse-shoe pitching and races made up the afternoon program. Fred Swan, captain elect of the Stanford Varsity football team, and Carroll De Mant were pitchers for the rival ball teams. Charles Palmer was horseshoe champion. The winners of the races for the younger boys and girls were Roger Piers, Dick Boyer, Katherine Palmer, Louanna Weber, Dorothy Boyer and Kenneth Gowans. Manuel Piers was chairman of the committee in charge of the picnic.

Next Sunday evening the association will hold a corn and wino roast at the Piers place. All members wishing to attend are asked to notify the secretary, K. Palmer.

Gymkhana Planned for Club

A gymkhana and polo match are planned for the week end at the Menlo Park Circus Club, which is nearing the end of its most enthusiastic season. The participants in the gymkhana will be the Menlo Circus Club and the juniors of the San Mateo Polo Club. A polo match is scheduled between the red and white teams of the San Mateo club.

Your Support Is Urged

The people of Menlo Park are urged to give Senator S. M. Shortridge a big vote on August 31st. The campaign is rapidly growing to a close and from reports received from all portions of the state indicate that he will sweep the state and be returned to Washington by a plurality in excess of 100,000 votes. It is to be hoped his home town will lead in the plurality that is to be given him by the peninsula cities. His opponents live in far away Los Angeles. Why vote for them? Vote for the local candidate and give him a rousing vote.

Enjoyed Moonlight Picnic

The members of the Christian Endeavor Society of the Presbyterian church enjoyed a moonlight picnic at Kendall Dell last evening. About fifty young people motored down to the grounds and their enjoyed tempting refreshments. The members motored back to town before midnight.

Quietly Married In San Francisco

Mrs. Maylou Hegner, residing on Mills avenue, was quietly married last week to a San Francisco merchant. The pretty bride is a daughter of Mrs. Chandler, now living in Los Angeles.

Property On Highway Sold

Valentine Boodhoo has sold his property on the highway formerly the M. F. Duff residence to Chew Chuck, the transfer man do-

ing business in the old Collis block. The purchase price of the property was \$14,500. Mr. Boodhoo, who is a Russian Count, bought the realty for \$5,000 a few years ago.

In re John Lusardi, an alleged insane person. Further hearing. Con. 3 weeks.

\$50,000 SUIT FILED
Sol Koff, the realtor who has subdivided the White Oaks Tract and who is one of the big real estate operators of the state, yesterday filed a suit in the Superior court here against William Maurer, the turbulent trustee of San Bruno, for slander and as a bail for his wounded feelings asks for the sum of \$50,000. Maurer is alleged to have said at divers times, "Stay away from the United Building and Development Co., of which Koff is president, for the president is a fugitive from justice from Chicago, where he was in business." Maurer is charged in the complaint with similar other statements derogatory to the character of the plaintiff. Ross & Rosa have been retained by the plaintiff to prosecute the suit. For some time Maurer has been the stormy petrel of the San Bruno board.

MASS TOMORROW IN BURLINGAME CHURCH
Court Junipero Serra Number 22 Catholic Daughters of America are urgently requested to attend seven o'clock mass and communion tomorrow morning in the Burlingame church. The mass and communion are to be offered up for the repose of the soul of Father James Grant.

William J. O'Brien, manager of the Sequoia theatre, underwent an operation for appendicitis at St. Luke's hospital in San Francisco Thursday. He is reported to be recovering as rapidly as could be expected.

ALLOWANCE ON USED CARS SHOULD BE OF LEAST IMPORTANCE

In the mind of almost every automobile buyer the all important thing to him in the whole transaction is the allowance on the used car. There is no denying the importance of this phase of the business transaction, as the inherent and bargaining instinct in every man prompts him to try in every way to secure a deal to his financial advantage. However, this should be the least consideration for the reason that every legitimate automobile dealer will give so near the same prices for a used car offered that the difference is practically negligible compared to the importance of the new car purchased.

An excessive allowance on a used car by an automobile dealer should warn the customer away from that new car, as it clearly indicates that something has happened which has reduced the value, not necessarily the asking price of the new car being offered for sale. Either a new model is on its way, a sharp decline in price, or the dealer is planning to discontinue his representation of the line. What is apparently gained in added valuation on the used car is soon lost by the rapid decline in resale value of the new one.

WELL KNOWN COUPLE TO BE WED TONIGHT

Miss Mable Williams, daughter of Mr. and Mrs. H. O. Williams of this city and Seymour Elkerinkotter, son of Mr. and Mrs. George Elkerinkotter of Stambaugh street will be married tonight in the Congregational church. The ceremony will be performed by Rev. C. H. Stevens.

WISE OLD BUCKS

The opening of the deer season in this county on August 1st was one of the most prosperous for the men and dogs engaged in the chase and at the same time a most disastrous one for the fleet-footed forked-horns that has taken place for some years. Not less than ten beautiful specimens of the antlered tribe were brought into the various markets of this city, while at Halfmoon Bay fifteen were hanging as a moment of the marksman's ability during the first three days of the open season, but since then the heavy fog on the mountains has resulted in a handicap to both men and dogs and the big boys, classed as three pointers, have profited by their early experience and have selected inaccessible points in the high ranges where they cannot be dislodged.

However a party from this city consisting of Fred Danz, the well known butcher his son, George Rudy and Albert Uhl, Ralph Dickerson, Sam Harvey and "Skipper" Lewis brought in one of the most beautiful bucks seen here for some time. Mr. Lewis, who has a summer home at Portola, and is affectionately referred to by the rest of the boys as the "Skipper" by reason of the fact that he is a veteran pilot, and owns a fleet of tugs and barges operating on the bay, brought the deer down at 300 yards with the first crack of his 30-30, the balance of the party are all old seasoned deer hunters, long past the age when buck fever is prevalent amongst young nimrods but the "Skipper" showed them all

that while he was entirely familiar with the shell banks and mud flats of the bay together with the winding channels of the Sacramento and San Joaquin rivers, he still knew something about the automatic action of a Winchester rifle, the adjustment of its sights and just when and how to pull the trigger.

Real Estate

Instruments filed in the office of the Recorder of San Mateo County as reported by GEO. H. RICE ABSTRACT CO.
